

# ***Start Your Lean Manufacturing Journey Today with an Introduction to Lean class***

## ***This is the 1<sup>st</sup> step to learning the Principles of Lean Manufacturing***

**This one-day workshop provides a fast-paced presentation with hands-on simulation activities that give you a clear understanding of the eight wastes in manufacturing and some real-world approaches for reducing them that will improve your bottom-line.**

*Workshop attendees will be assigned production jobs in a simulated factory. Four levels of simulation will be conducted with training and discussion between sessions. Involvement of class attendees is strongly required to maximize learning effectiveness.*

**“I didn’t expect to have so much fun!”**

**When was the last time you heard this comment about a class dealing with manufacturing issues?**

*We frequently get comments like this after our **Lean Manufacturing Workshop**. We believe that learning should be hands-on, fun and have immediate impact!*

## **TYPICAL LEAN MANUFACTURING RESULTS:**

- **Productivity increased 30% annually**
- **Defects reduced by 20% or more**
- **Lead times reduced by 90%**
- **Inventory reduced by 75% or more**
- **On-time delivery almost 100%**

### **Workshop Information**

**Date:** Saturday, Fall 2007 TBD

**Time:** 8:00 am – 5:00 pm

**Location:** TBD

**Cost:** \$65/person. Includes Lunch

**Cancellation Policy:** You must cancel within 48 hours of the class, or be charged the full amount.

***Class Limited to 18 Students  
Lean 101 Certificate upon  
completion***

*Due to regimented nature of the hands-on simulation exercises, attendance is limited to only 18 seats.*

**Register at: MLF Office**

**Course Taught by MEP  
In partnership with UVSC**
