

What kinds of jobs are there for ChE students?

Where are those jobs?

Analysis of BYU ChE Alumni Data

- Data obtained from BYU Alumni database
- Restricted to those with at least one ChE degree from BYU
- Only 1151 people entered the name of their employer
 - Classified into categories by Dr. Fletcher
- 1848 people entered the name of the State where they reside

BYU ChE Graduates 2013

Types of Jobs

(1151 BYU ChE Alumni)

Types of Jobs

(1151 people)

Location of BYU ChE Alumni

(1848 people)

What is the point here?

National Data

WHERE THE CHEMISTS ARE California, Texas, Florida, North Carolina, Illinois, Michigan, Ohio, and the Northeast employ the most chemists.

WHERE THE CHEMICAL ENGINEERS ARE California, Texas, Louisiana, South Carolina, Virginia, Illinois, Michigan, Ohio, and the Northeast employ the most chemical engineers.

NOTE: Employment of chemists (left) and chemical engineers (right) by state, May 2012. Ranges are defined by the Bureau of Labor statistics and are not continuous.
