

Chemical Engineering 391
Lifelong Learning Assignment

Due Date: November 23, 2015

You are assigned to make a personal plan for lifelong learning. You will need to address the following areas:

- 1) Profession (what profession, continuing professional education, etc.)
- 2) Church (continued spiritual growth)
- 3) Family (continual improvement)
- 4) Personal (physical fitness, hobbies, personality, etc.)

It is anticipated that this will take the form of 1 to 2 type-written pages. This is something you should value the rest of your life, so keep it in a place that you can review it frequently and revise it as necessary. Grading will be based on thought and effort, not on the value of your proposed goals.

Please consider the following:

What can you do to make sure that the desired learning takes place?

What timetable seems appropriate?

Looking back at the end of your life, what do you hope to have learned and accomplished? (use your imagination)

What will the Savior say to you as you review your stewardship with Him as you pass from this mortal stage of existence?
